Tina Rahimi

Data Scientist | AI Engineer

0921 538 4489 Tinarahimi.ce@gmail.com Tina200281 Tinarahimice Tehran

SUMMARY STATEMENT

Data Scientist / AI Engineer with experience building machine learning models, AI-powered applications, and intelligent decision-support systems. Skilled in Python, SQL, machine learning, NLP, and LLM-based architectures, including RAG, semantic search, and agentic AI systems. Experienced in developing end-to-end AI solutions, from data processing and feature engineering to model deployment, monitoring, and evaluation. Passionate about continuous learning, rapid experimentation, and delivering reliable, production-ready AI systems in collaborative and fast-paced environments.

EXPERIENCE

Data Scientist | Aug 2026 - Present
Alopeyk

- Analyze logistics and operational data using Python, pandas, and SQL to evaluate service performance, identify bottlenecks, and support business decision-making.
- Develop analytical workflows, reports, and visualizations using Python and Matplotlib to assess operational trends and communicate findings.
- Develop an LLM-powered analytics assistant using LlamaIndex and Streamlit, with Metabase integration for natural-language querying and exploration of business data.

Data Scientist (AI Engineer) | Dec 2024 – Jan 2026
IraniCard | Isfahan, Iran

- Developed machine learning models for flight ticket price forecasting using large-scale tabular datasets, performing feature engineering, feature selection, model evaluation, and performance analysis to support pricing insights and decision-making workflows. (Pateh)
- Designed automated evaluation and monitoring pipelines for forecasting models using Apache Airflow and Metabase, enabling performance tracking, analytical reporting, and model behavior analysis. (Pateh)
- Built intelligent automation workflows for customer order processing using Selenium and LLM-based agents, reducing manual operational effort and improving process efficiency. (IraniCard)
- Developed an AI-powered flight ticket purchasing agent capable of automating parts of the search and booking workflow. (Pateh)
- Built a RAG-based customer support chatbot leveraging historical customer service conversations as a knowledge base to improve response relevance and support efficiency. (IraniCard)

Data Scientist (NLP Developer) | Jan 2024 – Dec 2024
Saminray ICT Co. | Remote

- Researched and fine-tuned LLMs for Persian text processing, focusing on practical downstream performance and robustness.
- Implemented embedding-based approaches to improve semantic search and text classification quality and relevance.
- Built and optimized end-to-end NLP pipelines for chatbot and retrieval-augmented generation (RAG) applications, improving response quality and stability.
- Improved model usability for scalable delivery by standardizing pipelines, experiment structure, and handoff-ready outputs for product integration.

Tina Rahimi

Data Scientist | AI Engineer

0921 538 4489 Tinarahimi.ce@gmail.com Tina200281 Tinarahimice Tehran

Data Engineer Intern | Jul 2023 – Sep 2023
Digitoon | Tehran, Iran

- Contributed to building ETL pipelines for large-scale user activity logs to produce clean, analysis-ready datasets.
- Processed and analyzed datasets to generate insights supporting product and content optimization decisions.
- Supported personalization and engagement initiatives by assisting with ML experimentation and data preparation.
- Worked closely with the data science team on preprocessing, cleaning, and feature engineering for modeling workflows.

EDUCATION

BACHELOR'S DEGREE Computer Engineering | University of Isfahan Nov 2020 to Sep 2024 | GPA: 16.93

Core Areas: Artificial Intelligence & Software Engineering

Bachelor’s Thesis: LLM-based Security Vulnerability Detection

SKILLS

Programming

Python, Java (familiar)

Machine Learning & Deep Learning

Scikit-learn, PyTorch

LLM / Generative AI & RAG

LlamaIndex, LangChain, LangGraph, Transformers(Hugging Face), OpenAI API, Ollama, prompt engineering

Backend & Serving

FastAPI

NLP & Text Processing

Hazm, NLTK

Data Analysis & Visualization

NumPy, Pandas, Matplotlib, Seaborn, Metabase

Databases & Search

SQL Server, MongoDB, Redis, Elasticsearch

Data Engineering & MLOps Tooling

Airflow, MLflow, Git, Docker

Testing / Automation

Selenium

LLM Observability & Evaluation

Arize Phoenix (Phoenix)

Core Knowledge

Machine Learning, Deep Learning, NLP, Applied Linear Algebra
