

Tina Rahimi

Data Scientist / AI Engineer

0921-538-4489 Tinarahimi.ce@gmail.com Tehran Tina200281 Tinarahimice

EDUCATION

BACHELOR'S DEGREE Computer Engineering

University of Isfahan Nov 2020 to Sep 2024

GPA: 16.93/20 ($\approx$ 3.386/4.0)

Core Areas: Artificial Intelligence & Software Engineering

Bachelor's Thesis: LLM-based Security Vulnerability Detection

SKILLS

Programming

Python, Java (familiar)

Machine Learning & Deep Learning

Scikit-learn, PyTorch, Transformers (HF)

LLM / Generative AI & RAG

LlamaIndex, Hugging Face Datasets, OpenAI API, Ollama, RAG pipelines, embeddings, prompt engineering

Backend & Serving

FastAPI

NLP & Text Processing

Hazm, NLTK

Data Analysis & Visualization

NumPy, Pandas, Matplotlib, Seaborn

Metabase

Databases & Search

SQL Server, MongoDB, Elasticsearch

Data Engineering & MLOps Tooling

Airflow, Git, Docker

Testing / Automation

Selenium

LLM Observability & Evaluation

Arize Phoenix (Phoenix)

Core Knowledge

Machine Learning, NLP, Applied Linear Algebra

SUMMARY STATEMENT

Data Scientist / AI Engineer specializing in NLP and LLM-powered applications (Persian text processing, RAG, semantic search, and intelligent agents). I'm driven by continuous learning actively exploring new approaches and tools, prototyping quickly, and turning the best ideas into reliable, production-ready systems. I thrive in collaborative teams and prefer fast-evolving environments where I can take on new challenges and keep expanding my skill set.

EXPERIENCE

Data Scientist (AI Engineer) | Dec 2024 – Present IraniCard | Isfahan, Iran

- Designed and productionized intelligent agent workflows to automate key steps in order processing, improving system reliability and reducing manual intervention.
- Partnered with product, operations, and engineering teams to integrate AI-driven features into existing platforms and iterate based on real user/operational feedback.
- Built and refined ML-driven decision support to enhance user purchase decision-making (e.g., scoring/segmentation/ranking logic aligned with business goals).

Data Scientist (NLP Developer) | Jan 2024 – Dec 2024 Saminray ICT Co. | Remote

- Researched and fine-tuned LLMs for Persian text processing, focusing on practical downstream performance and robustness.
- Implemented embedding-based approaches to improve semantic search and text classification quality and relevance.
- Built and optimized end-to-end NLP pipelines for chatbot and retrieval-augmented generation (RAG) applications, improving response quality and stability.
- Improved model usability for scalable delivery by standardizing pipelines, experiment structure, and handoff-ready outputs for product integration.

Data Engineer Intern | Jul 2023 – Sep 2023 Digitoon | Tehran, Iran

- Contributed to building ETL pipelines for large-scale user activity logs to produce clean, analysis-ready datasets.
- Processed and analyzed datasets to generate insights supporting product and content optimization decisions.
- Supported personalization and engagement initiatives by assisting with ML experimentation and data preparation.
- Worked closely with the data science team on preprocessing, cleaning, and feature engineering for modeling workflows.
